PROFILE

Game Development and Interactive Media engineer with experience in object-oriented programming, unit testing, UI and backend integration in Unity. Delivered a client website with interactive 3D visualization and a contact form. Interested in bringing these foundations to general software development and learning through practical engineering work.

TECHNICAL SKILLS

Languages: C#, C++, Python, JavaScript, PHP, HTML and CSS.

Tools and frameworks: Git, Docker, Vue.js, GitHub Pages; familiarity with AWS.

Development: object-oriented programming, unit testing, UI and backend integration; MySQL, PostgreSQL, SQL Server, AWS RDS and DynamoDB.

RELEVANT EXPERIENCE

Web Developer | Freelance | July 2026

- Built and published [Ká Hai](#) on GitHub Pages: two interactive 3D viewers, camera controls, PBR material adjustment and Formspree contact integration.

Unity Developer Intern | Attribute Overload | May-December 2024

- Developed MeasureSystem Real-Time, a measurement tool published by Attribute Overload on the Unity Asset Store.
- Implemented unit tests, UI and backend connections; researched and developed real-time AI navigation tools.

Unity Backend Programmer | Icaro Technologies | July-August 2024

- Researched and developed Unity VR mechanics for an educational simulation of milling-machine operation.

Unreal Engine 5 / Blender Instructor | Freelance | March-June 2025

- Taught modeling, sculpting, texturing, UE5 asset integration and introductory Blueprint scripting.

SELECTED PROJECTS

MeasureSystem Real-Time: a published Unity tool for inspecting object dimensions and measuring distances between points in real time. [Product listing](#).

BananasEngine: academic C++ graphics engine using DirectX and an ImGui template. Includes OBJ loading and interactive object transformation, color and lighting controls. [Source code](#).

IA_FSM_Unity: academic exercises in finite-state machines, patrol, perception and navigation. [Source code](#).

ADDITIONAL EXPERIENCE

Co-founder, JaRo Labs | February 2026-present: 3D modeling and printing, equipment maintenance, customer orders and Excel tracking dashboards.

EDUCATION & LANGUAGES

Engineering in Game Development and Interactive Media

Universidad Cuauhtémoc Querétaro | 2021-2024

Spanish: native | English: B2 | Based in Querétaro, Mexico; available immediately.
